

LOGISTICS SPECIALIST WORKSHOP

This one-day course is intended to provide Urban Search and Rescue (US&R) Task Force personnel with a brief overview of the logistics functions necessary to keep a US&R team operating efficiently before, during, and after a disaster or planned event. You will learn the essential requirements of providing support, re-supply, transportation, sustainment, and maintenance of an equipment cache. This training will not only benefit your Logistics Managers and Logistics Specialists but will give other task force members an appreciation for what goes on behind the scenes to keep task force operations running smoothly.
